

ALP SCHOOLS

CYBER SECURITY STATEMENT

Date Reviewed: February 2026

ALP Schools takes cyber security and data protection extremely seriously. We are committed to safeguarding the digital systems and personal information of our pupils, staff, and wider school community.

Our approach to cybersecurity is built around protecting the confidentiality, integrity, and availability of our systems and data across all School sites.

Our Commitment

We are committed to:

- Protecting personal data in line with UK GDPR
- Maintaining a secure network infrastructure
- Using secure cloud-based systems
- Enforcing strong authentication controls, including multi-factor authentication
- Monitoring and filtering internet access in line with Department for Education standards
- Providing regular cybersecurity awareness training for staff
- Maintaining backup and recovery processes to support digital resilience

Governance and Oversight

Cyber security is overseen at The School level and forms part of our safeguarding, risk management, and governance responsibilities.

Our Governing Board maintains oversight of cyber risk and ensures appropriate controls and monitoring are in place.

Incident Response

We maintain structured procedures to respond to cyber incidents quickly and proportionately.

In the unlikely event of a significant data breach, we will act in accordance with regulatory requirements and ensure appropriate communication.

Continuous Improvement

Cybersecurity is an evolving area. ALP Schools is committed to reviewing and strengthening its digital resilience in line with national guidance and emerging threats.

If you have any concerns regarding cybersecurity or data protection, please contact the school directly.
